## **DETAILED ACTION**

### ***Status of Application & Response to Arguments***

1. This Office action is in response to the Appeal Brief filed 11/06/2009. The arguments set forth in the Appeal Brief have been fully considered and are found persuasive. Accordingly, the finality and the claim rejections as set forth in the Office action dated 05/21/2009 are withdrawn. Claims 17-36 are pending in this application.

### ***Examiner's Amendment***

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Clifford A. Ulrich on 12/14/2009.

The application has been amended as follows:

Claim 36 is cancelled.

In claim 35, the first term "She" is replaced by the term "The".

### ***Allowable Subject Matter***

3. Claims 17-35 are allowed.

4. The following is an examiner's statement of reasons for allowance: The present claims are allowable over the closest prior art reference of record: Osaka et al. (US 5,057,360).

Corresponding to the method set forth in claim 17, Osaka et al. discloses a method for preparing a ceramic green sheet comprising (1) ball milling and kneading a mixture comprising 100 parts of a ceramic powder, 70 parts of a solvent mixture, and 1.5 parts of a dispersant, (2) adding to the resulting mixture 25 parts of a binder solution (45% solids content in toluene of an acrylate/methacrylate copolymer), 1 part of a plasticizer, and kneading, (3) removing air from the resulting slurry under vacuum and adjusting its viscosity, and (4) applying the slurry to a substrate using a doctor blade followed by heat treatment to produce a ceramic green sheet. It is clear that the prior art fails to teach the first two steps in the presently claimed method and it fails to teach an organic acid. While there may be a reasonable basis to show that it would have been obvious to a person having an ordinary skill in the art to have incorporated an organic acid in the prior art method, there are no obvious reasons for modifying the prior art method to arrive at the claimed method.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
